The Corona virus has emerged in the seafood market in Wuhan, China. It took some time to identify at first. Some even argued that it came from bat soup. But this virus continues to spread day by day. Many events and even the Olympics are being canceled from now on. The number of cases and deaths increases day by day. This virus, which is seen in South Korea, Italy, Iran, Spain, Japan and Thailand, is spreading all over the world. How will we protect it from this virus? Still no solution found. The easiest way to protect against this virus is to wear a mask. This respiratory disease. Requires wearing a mask. Governments are trying to take precautions when people who fall to the ground are seen at first, but this virus needs to be remedied. It needs to have a vaccine. Hands, mouth and arms should be washed with this solution and saline solution should be drawn into the nose at least 5 times a day. People sitting by the sea and near the ocean. They can supply this water from the Sea and Ocean. Studies have shown that this corona virus and other viruses are destroyed. The same can be done with vinegar. Because the chamber is an acidic and germicidal liquid. It is recommended to drink one tablespoon of vinegar on an empty stomach in the morning and evening. Vinegar and brine solution is antiseptic. And it is very useful. Everyone and the whole world must protect themselves from this virus. And take care of your health.
