With the advent of fast-moving technology keyhole surgery artificial intelligence and Robotic Surgery Surgeon can explore all the anatomical spaces, reach inaccessible and intricate areas with small sharp and precise instruments to enable minimal tissue damage and improve the safety window.

As Quoted by Mr Albert Einstein we stand on the broad shoulders of our ancestral scientists who worked hard under unfavourable conditions to procure retain and spread knowledge for the sake of Humanity.

All the surgeons are in debt and Grateful to all the Anatomists who have laid the foundation and carved the path of current progress.

Abdominal wall Anatomy and abdominal wall Reconstruction Surgeons have revolutionised the Hernia Surgery.

Anatomy is first subject which fascinates all surgeons along with its anomalies and variations which we keep studying all throughout life through our patients.

Magic of Anatomy helps Surgeons to create Miracles in patients' Lives.
