### Abstract

In this thematic research article, its author presents a large phaleristic selection dedicated to the anatomy of the human muscular system, reflected in thematic icons. The work presents 201 copies of thematic badges.

**Keywords:** Anatomy; Human Muscular System; Phaleristics; Thematic Badges

### Introduction

The study of different facets and directions of medical science is always relevant and in demand. Quite new and exclusive is the presentation of different areas of anatomy, its organs and systems, in collecting media and, in particular, in phaleristics, in collections of thematic icons. In this article, the muscular system of different parts of the human body, or myology, will be presented. The author divided the presentation of the research materials into several sections.

### Aim of study

The purpose of this article is to reflect the representation of phaleristic materials, in the form of thematic badges and brooches, dedicated to human anatomy muscular system, its various organs and systems.

### Material and Methods

When writing this article, its author uses methods such as literary critical analysis of all available, at the time of writing, domestic and foreign sources of information. After careful selection and systematization of selected illustrative material, they were divided into subsections of different organs and systems of the human body. All found illustrative materials were converted by the author into screenshots, and used in this article, into thematic illustrations,

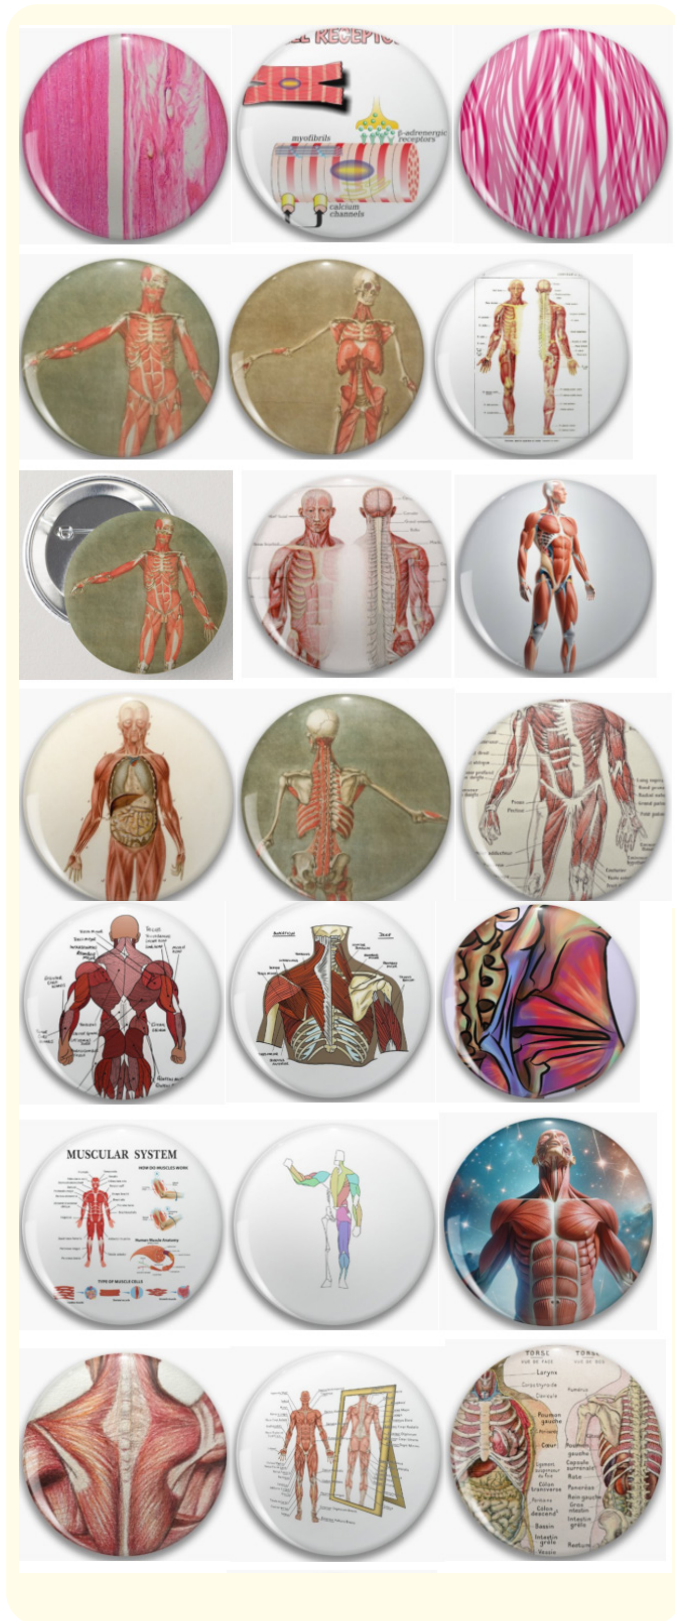

with strict observance of copyright, and mandatory indication of the sources of their borrowing on the Internet.

### Results and Discussion

So, at the beginning, in figure 1, thematic icons will be presented with a general image of the human muscular system and its elements. Next, in figure 2, a phaleristic selection dedicated to the human torso, chest, both front and back, and a view of the muscles in the back area will be presented. Next, in figure 3, images of the muscles of the head and neck, front and back, will be presented. In figure 4, icons will be presented depicting the muscles of the upper limb and its various parts. In figure 5, a phaleristic selection of thematic icons dedicated to the muscles of the lower extremities and all its departments will be presented. A total of 201 thematic icons. As already mentioned, in figure 1, a large thematic selection is presented, consisting of 99 thematic icons dedicated to general human myology [1-8].

In figure 2, badges representing the muscular system of the human head and neck are presented. In total - 73 copies of thematic badges for this section [1-8].

Figure 4 shows a selection of thematic badges, 20 in total, depicting the muscles of the upper limbs and its parts [1-8].

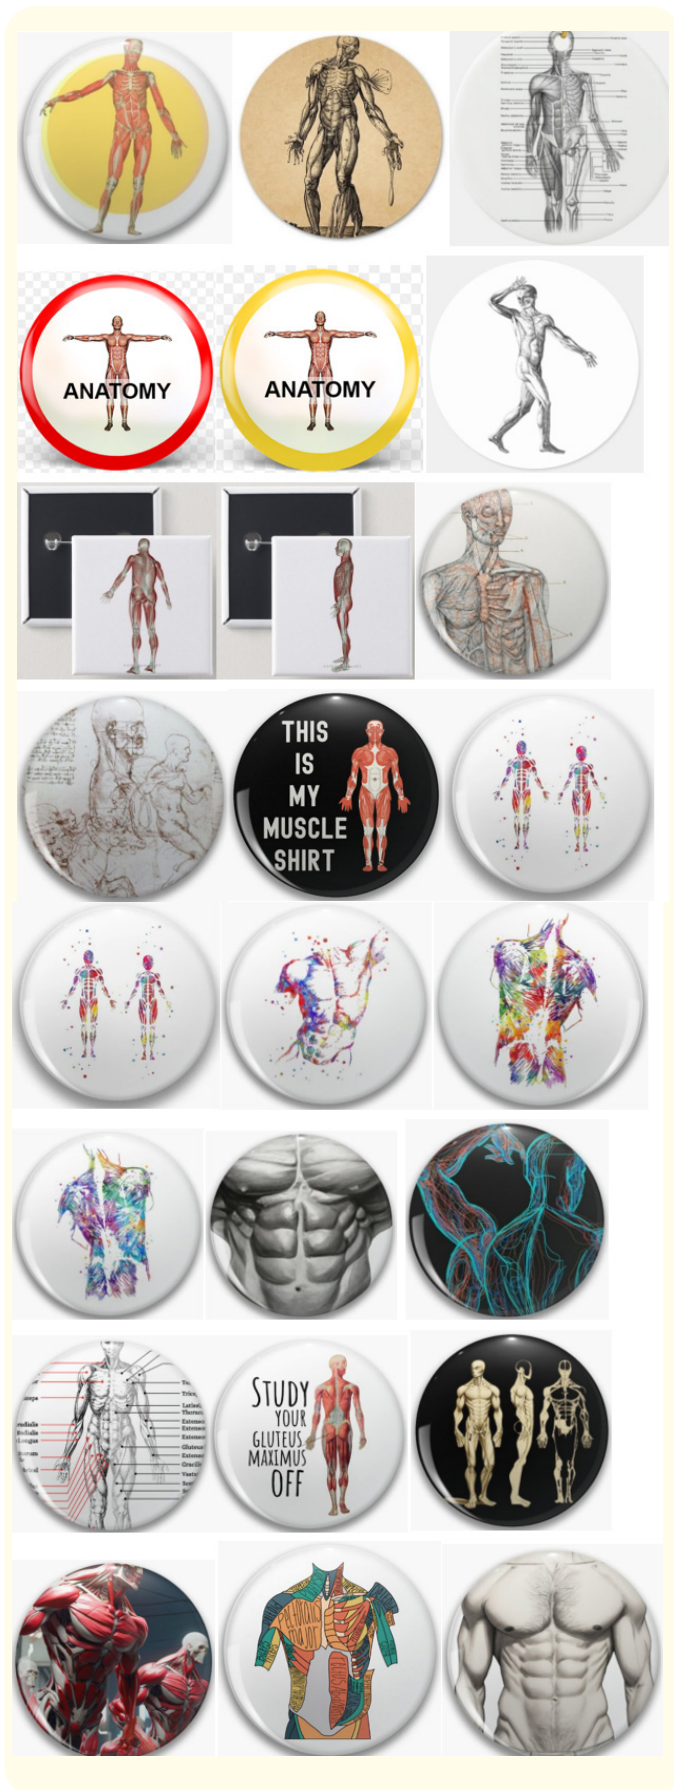

Figure 1: A selection of thematic badges dedicated to the human muscular system.

Figure 2

Figure 3: Anatomy of the muscles of the upper limb and its parts.

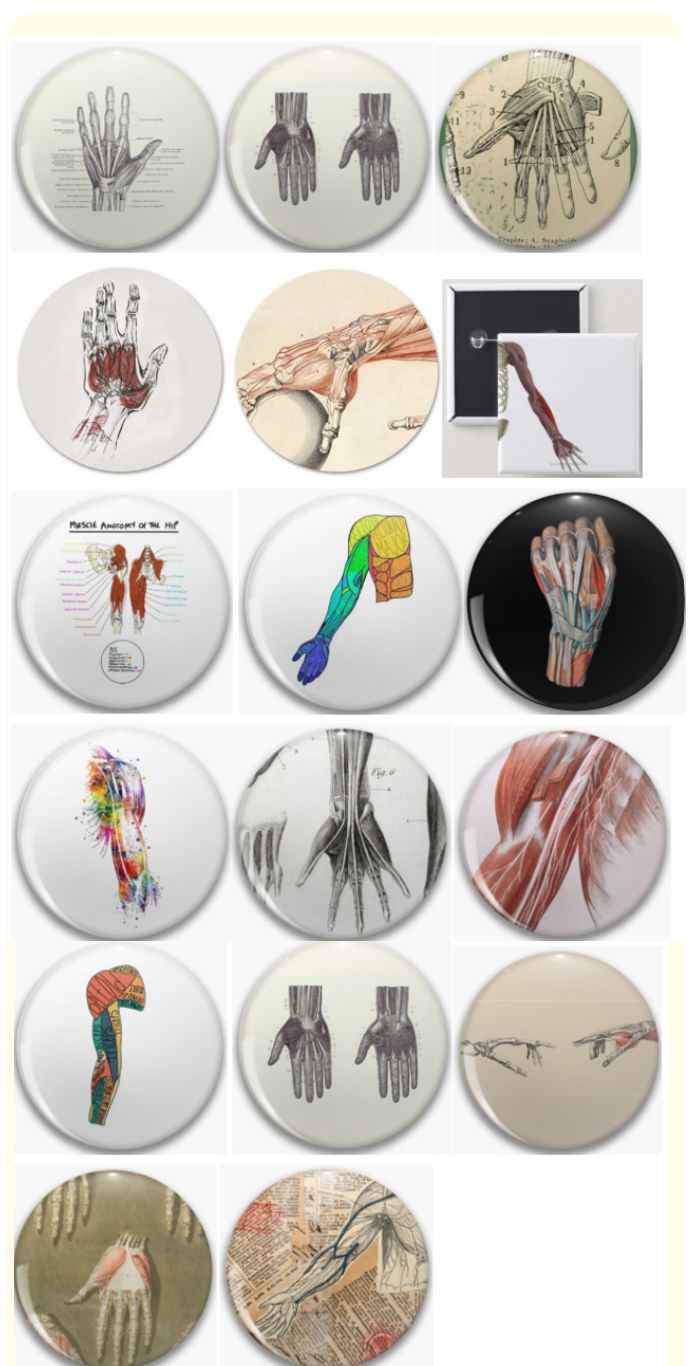

Figure 4: Muscles of the upper limb and its parts.

Next, in figure 5, a selection of 9 thematic icons is presented, representing the anatomical features of the muscles of the lower limb and its parts [1-8].

This concludes another article devoted to human anatomy and its muscular system, reflected in thematic badges.

Figure 5: Anatomy of the muscles of the lower limb and its parts.

### Conclusions

- The author of this research article fully succeeded in achieving the goal stated by them.
- The illustrative materials presented in this research article, in the form of screenshots, complement the article in a bright and creative way.
- Reflection, in the means of collecting, research materials on various sections of medicine and, in particular, human anatomy, enriches our knowledge and ideas about medicine, its history and heroes.
