Abstract

Cancer is one of the leading causes of death among patient in United States after death due to heart diseases. According to traditional Chinese medicine's reasoning, cancer comes from energy deficiency and formation of interna Fire (that is another energy imbalances that comes when the patient has energy deficiency or excessive energy).

The purpose of this article is to show that the increase incidence of cancer is not only related to advanced age of the population but has an energy alteration in the entire population nowadays caused by the influences of the electromagnetic radiation from the use of cell phones and computers characterizing a new global immunodeficiency.

Methods: I am medical doctor working in Western and in traditional Chinese medicine in my own clinic in Brazil. In a research made by myself in my clinic in Brazil (2015-2020), I showed that 90% of all my patients were in the lowest level of energy, rated one out of eight. If I analyze the energy of the population today (2023-2024), I would say that it is affecting 100% of all my patients independently on the type of diagnosis or the age group. The use of any kind of highly concentrated medication or highly concentrated vaccines or the use of metallic implants inside the body can reduce even more this energy and can increase the chance to have cancer.

Keywords: Cancer; Heart Diseases; Brazil

Introduction

Cancer is one of the leading causes of death among patient in United States after death due to heart diseases [1].

One of the reasons for this increased incidence of cancer among patients, according to Western medicine's point of view is that, the population is getting older and the increase in the stress that comes from increase life expectation could be one of the reasons [1].

But not only this explanation can justify so many cases recently, mainly after the massive COVID-19 vaccination after the global pandemic that began in 2020 [2].

If we analyze only the symptoms presented by the patients, we will not understand the real cause for this increased incidence that is happening in our world. According to Hippocrates (460 a.c - 377 a.c), the father of medicine, "we need to use the oldest medical traditions prior to the knowledge we have nowadays" [3].

If we analyze from the point of view of traditional Chinese medicine, which exists for more than 5 thousand years, they understand that diseases began when there is an imbalance of the internal energy, and every cancer comes from energy deficiency and formation of internal Fire (that is an energy alteration when there is an energy deficiency situation) [4].

In research made by myself in my clinic in Brazil from 2015 to 2020, analyzing a 1000 patient's energy of the five internal massive organs (Liver, Heart, Spleen, Lungs and Kidney) of the five elements theory of traditional Chinese medicine using the radiesthesia procedure, I concluded that 90% of all my patients at that time were in the lowest level of energy, rated one out of eight [5].

If I measure the energy of all these patients in 2023, I would like to say that 100% of them are in the lowest level of energy, independently on the type of diagnosis or the age group [6].

The alterations presented in the energy inside the human being is not studied by Western medicine's doctors because after the implementation of Flexner report in 1910, they only consider "scientific" what they could proof by laboratory or radiological level and the part of energy that composes the human being was put aside and not studied until today [7].

But according to the research made in my clinic in Brazil, the part of the energy is what is affected in the human being on these days and it is the cause of the increase number of the formation of any kind of diseases such as hypertension, diabetes, myocardial infarction, strokes, auto-immune disease, and in the last phase, the development of cancer [5].

There is a study written by Huang (2021) titled What Are the Markers That Predict the Development of Having Cancer in the Future Without Laboratory or Radiological Tests? where I am showing that we can make preventive measurements in the development of cancer measuring the energy of our patients, without using any laboratory or radiological exams. Because the alterations in the energy level comes before the alterations in the exams and if we do the diagnosis years before the formation of cancer, we can treat this energy deficiency condition (using highly diluted medications according to the theory of Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine) and prevent the formation of this disease in any part of the body. To occur the formation of cancer, it is necessary to have approximately ten to twenty years of energy deficiency situation to develop cancer [8].

The use of radiation methods to do the diagnosis and treatment of patients with cancer is also affecting the energy part of these

patients presented nowadays leading to reduction of this energy, causing more immunodeficiency, as showed in the article written by Huang (2022) titled Can Malignant Cancer Worsen with The Use of Radiation Methods of Diagnosis? [9].

The use of any kind of highly concentrated medications in this new type of population that we are having nowadays is causing a reduction even more of this internal energy, causing more immunodeficiency and leading to more propensity to have any kind of chronic disease, such as diabetes, hypertension, myocardial infarction, strokes and also, the formation of any kind of cancer, as shown in the article written by myself (2021) titled Can the Medications we Use Make us More Likely to Have Cancer in the Future? [10].

The increase incidence of the use of metallic implants in the teeth due to alveolar bone loss (also caused by this energy deficiency situation) is also increasing the chance to evolve to any disease, in this case, cancer because any metallic implants inside the body can reduce this internal energy and can worse the immune system, as showed in the article written by myself (2021) titled How is the Mechanism of Immunodeficiency Caused by Metallic Implants and What Can they Cause when Inside the Patient's Body? [11,12].

The use of these kinds of implants can induce more chance to have cancer and also, development of metastasis, as shown in the article written by myself (2023) titled Which Could Be the Risk Factors for Developing Cancer After Receiving The COVID-19 Vaccine [2].

This mode of thinking can include patients with any kind of metallic implants due to orthopedic surgery, because the use of any kind of metallic implants can reduce the internal energy, that it is very compromised in this new type of population that we are facing nowadays, as shown in the article written by myself (2021) titled How is the Mechanism of Immunodeficiency Caused by Metallic Implants and What Can they Cause when Inside the Patient's Body? [11].

Also, the use of highly concentrated vaccines nowadays is also causing complications of these patients, as shown in the article (2022) titled Why is Highly Diluted Oral "Vaccine" For COVID-19 the Safest Option in this Pandemic? The reason that highly diluted oral vaccines is better to prevent the COVID-19 nowadays is that,

according to the new type of population that we are having these days, considered immunodeficient and very low in energy, the use of highly diluted vaccines can increase the internal energy of the patient, preventing complications such as myocardial infarction, strokes, sudden death [13].

So, we will need to begin to turn our eyes to this part of the human being that it is the energy, that are invisible by the naked eyes, to prevent the formation of cancer in our patients and also, to understand which are the factors that could trigger the perverse evolution or even increase the chance of this patient to have metastasis when submitted to any kind of procedure to do diagnosis or treatment of this disease [14,15].

To summarize, I would like to say that cancer is only the “tip” of the iceberg and the real cause of the alterations leading to this increased incidence of cancer is submerged under the ocean line, that we are still not studying nowadays, due to the rules implemented in the past [7,15].

The conclusion of this study is to demonstrate that the increase incidence of cancer on these days is caused by the reduced energy state of the entire population caused by the chronic exposition to the electromagnetic radiation and the use of any kinds of medications or vaccines or metallic implants that could reduce even more these energies can increase the chance to have cancer.

The conclusion of this article is to demonstrate that the increase incidence to have cancer is related to the alteration in the energy part of the human body that it is invisible to the naked eyes and not studied by Western medicine’s schools, caused by the modernization of telecommunication after implementation of cell phones and computers. The use of highly concentrated medications, highly concentrated vaccines or the use of metallic implants inside the body can reduce even more this energy and can worsen the immune system increasing the chance to have any type of cancer.
