The strength the look and of course the killer smile on face is all off the board if teeth are not healthy. A guy smiling with white and healthy teeth having 20 inches' chest look much smarter than one having 40 inches but missing and unhealthy teeth. After all a beautiful smile is all one and only needs. Modern world is all about appearance. Same time "the warriors" our teeth possess functions in day to day life like chewing to fulfill our mighty stomach, proper pronunciation for communication, maintaining the muscle tone of cheeks and it will go on. Even though it possesses so much it has been kept ignored by many among us with the saying "we have 32 teeth, even if we lose a few we have another set of teeth with us". This is still the sad reality among many of us. The awareness is building up but we need more hands to join in the mission of healthy teeth for all. Teeth are like LOC of our body. It protects us from outside unwanted invasions like our Indian Army "salute to them", decreasing their numbers will decrease our strength on borders. The same concept applies in our own oral cavity. Loss of tooth will weaken our oral environment leading to decrease health. It's not like we can't manage with loss of few teeth. Managing will be like driving home to office of a distance of 5km by bicycle instead of any motor vehicle. In both condition we will reach the destination but you are smart enough to understand the CONDITION You will be in both cases. Every tooth in oral cavity has specific function to do which arise the need to protect the individuals to maintain a good oral health. The better health of oral cavity will have a healthy life . Last but not the least a happy smiling face. As someone has truly said "IT'S ALL STARTS WITH A SMILE".
