The world is facing a fierce virus, COVID 19 since last year that caused disease and death of many People around the world, stopping the movement of air traffic and transportation, paralyzing movement as a whole and losses in the economy in the entire world, and with the length of time and the absence of a vaccine to date and the attempt to balance between the health of individuals and the economy, the majority of countries turned to the idea of coexistence with the virus, that is, life continues. With the precautions for infection from the disease and coexistence with it, and the life in the continuity of the presence of the virus and its success, two essential factors must be activated. The first basic factor is the new technology for the principle of prevention, better than the treatment represented in the cloud of things from the Internet of things, cloud Computing, big data, Artificial intelligence and 5G, the fifth generation of communications.

The second key factor is the emotional intelligence of its importance in this difficult period for self-control and the reduction of material and moral losses in these difficult moments when humanity as a whole passes both material and moral losses together.

We need it in every home, every company, every community, every country, and the entire world as a whole, with different exposure to material and moral losses.

In the era of COVID 19, the best solution to get out of the current crisis is to use both cloud-of-things technology CLOUT to prevent disease by identifying the sufferer to avoid and using emotional intelligence EQ to get out of the crisis.

In education, 4 axes are science, engineering, technology, and Math. A fifth axis, medicine, must be added so stem should be replace by STEMM by adding medicine to it.

In aviation a recent Survey, to choose between 4 choices: passenger wearing MASKS All the time, FAST INSPECTION OF high Temperature or COVID 19 test OF Passengers, Empty the middle seat in AIRCRAFT for social distancing, OR ALL THE Above, most of them select all the Above, Awareness.

Another survey what the reason for your travel: visit family and friends, or tourist, most they select visit family and friends. Human Being are emotion not like ROBOOT.

COVID 19 risk levels by activities in a 9th levels the MOST dangerous two levels represent 9th level places like: LARGE MUSIC CONCERTS, Bars And then 8th level places like: GYMS, SPORTS STADIUMS, Gyms, Churches and Mosques...ALL IN RED COLOUE.

From level 7 to level 6 in sequence places like schools Basket Ball then, movie theaters, restaurants all in ORANGE COLOUR.

LEVEL 5 LIKE Airplane, Malls in Yellow color and Level 4 in light green like doctor office waiting room.

Level 3, 2, 1 in dark green and IN sequence like hotels, getting fuel, getting takeout from restaurant.

The Probability of contagion is v High 90% if two person one healthy and other infected does not wearing a mask and high 70% if the healthy one wear a mask and the infected one does not wear a mask, and medium 5% if the infected one wear a mask and the healthy one does not wear a mask, LOW 1.5% IF BOTH Wearing A mask, and none if healthy one stay at home.

That is why the most important thing is to Detect the infected person by using clout tech and the people that attach to him by clout to reduce number of infected and dead people WITH COVID19 infection.

So, the cloud of things is used in prevention as a good treatment and uses emotional intelligence to cross from the current crisis. EQ example, the crisis causes frustration and loss of confidence, so the family finds the father thinking about the decrease in salary or his loss or leaving work and consequently the effect on his interactions with the family as a whole, Children after daily life heading to school every day in the morning and afternoon at club, were staying at home for weeks and months and in need of emotion, nostalgia, patience and wife as the extent of their anxiety about the disease

and the impact on the family in addition to the elderly from the ancestors and isolating them in places and homes for fear of infection and preventing visits and trying to increase communication Telephone and social communication with them to make up for it. All this is on the family. In work environment accumulated losses and balance between laying off employees to reduce losses and it is the easiest and most difficult solution as a social dimension and between reducing salaries and between the return of activity and the increase of COVID 19 infection all of this needs to control emotion and self in dealing especially the leaders Because workers in the case of seeing their leadership confident and challenging to win over the difficult situation they imitate them In the event of the opposite, the opposite occurs.

WHY EQ & CLOUT in LIFE Beyond COVID19?

EQ Emotional intelligence is twice as important as other skills in determining outstanding leadership. By managing your emotions and relating well to others, you can achieve higher levels of influence as well as personal well-being.

How to use those feelings more productively to make stronger decisions, overcome negative thoughts, control yourself in volatile situations, or understand others when they act in a way that surprises or angers you.

Identifying and managing your own emotions and to react to tough situations like COVID 19 with resilience, Respond to stress productively AND TO Persuade and to influence others

From a scientific standpoint, emotional intelligence is the ability to accurately perceive you're own and others' emotions; to understand the signals that emotions send about relationships; and to manage your own and others' emotions.

Great leaders move us-they inspire, motivate, and energize us, You can be a successful leader without much emotional intelligence if you're extremely lucky and you've got everything else going for you, BUT THIS IS NOT THR Right TIME and The Right situation, SEE COVID 19 OUTBREAK.

As COVID-19 continues to spread widely and claim lives, Clout technology is helping halt the COVID-19 outbreak. Modern technologies used by Developed countries in CLOUT to combat the Corona virus 19.Clout include advanced tech like IOT, AI, CLOUD, 5G, 3D.Robots and artificial intelligence, BLOCK CHAIN, AR, VR, MR are used to find infected cases, learn about the condition, write a report on each case, also to de-liver food and medicine to patients in hospitals to prevent contact and communication.

The establishment of a new health system for each person on

the mobile in three colors green, yellow and red, allowing green Freedom of movement, yellow in certain places, and red with quarantine. Applications on the phones help to know the number of the infected and their whereabouts and personal data about them to announce the cases of corona. Using of three dimensional printing to build rooms and hospitals for treatment to speed the achievement.

Behind every ordeal Crisis a grant And Activation of CLOUD OF THINGS CLOUT AND Emotion intelligent EQ in the entire world could be the Grant of COVID 19 Pandemic.
