

Are the Herpes Zoster Cases Nowadays Really Caused by the Reactivation of Varicella Zoster Virus or Not?

Introduction

We are passing through another phase of our planet where the people are not the same as mentioned in the past [1].

With the increasing necessity of modernization of our telecommunication creating modern cell phones that has the ability to visualize people from any part of the world, in seconds, we are paying a big bill for this modern world [1].

The human body is composed by many different organs and systems but all of them are commanded by each internal massive organs of the five elements theory of traditional Chinese medicine [2,3].

These correlations are not studied by Western medicine's medical schools because since the implantation of Flexner report in 1910, they only consider "scientific" what they could proof by laboratory or radiological level and the part of energy that composes the human being was put aside [4].

According to Western medicine's schools, the reactivation of varicella zoster virus is called shingles or herpes zoster [5].

If we analyze the other point of view of older medicine's such as traditional Chinese medicine, they understand that herpes zoster comes from formation of internal Fire, caused by internal energy alterations such as deficiencies [6].

In traditional Chinese medicine, shingles or herpes zoster is known as Huo Zhu Chuan (Fire Pearl Sore), Huo Dai Chuan (Fire Girdle Sore) Chan Yao Huo Dan (girdling Fire cinnabar) [6].

In research analyzing a 1000 patients' energy of the five internal massive organs of the five elements theory of traditional Chinese medicine, from 2015 to 2020, prior to the COVID-19 pandemic, 90% of all my patients were in the lowest level of energy, rated one out of eight [7].

If I measure the energy of all my patients today (2023) 100% of them will be at the lowest level of energy, rated one out of eight. This mean that the organs that are responsible for the production of Yin and Yang energy (Kidney), production of Blood (Spleen) and distribution of all these energies Qi (Lungs and Liver) and for controlling the Blood flow inside the blood vessels by the Heart were not working in the majority of patients leading to a state of global immunodeficiency as mentioned in the article written by myself (2023) titled New Global Immunodeficiency [8].

This state of lack of energy is leading to a formation of internal Fire, causing the formation of many clinical manifestations such as anxiety, panic syndrome, schizophrenia, diabetes, menopause symptoms, hypertension, community and hospital infections, etc. [2,3,9-14].

So, in this case, many different clinical manifestations can come from the same energy imbalances and herpes zoster comes also comes from energy deficiency and formation of internal Fire [15,16].

So, in this new global immunodeficiency, I am noticing an increasing use of varicella vaccine to prevent this infection but as they are not treating the cause of the manifestations that are presented inside the "root" of the tree, showed in the article written by myself (2023) titled Energy Alterations of Elderly Patients That Developed Herpes Zoster After Receiving COVID-19 Vaccine [15].

In this article, I am showing an 80 years-old female patient with history of herpes zoster in the right part of the thorax days after receiving the third dose of the COVID-19 vaccine. I measured the energy of the five internal massive organs using radiesthesia procedure, and I noticed that all her internal five massive organs were in the lowest level of energy, rated one out of eight. Instead of giving anti-viral medication, I gave her highly diluted medications according to the theory of Constitutional Homeopathy of the Five Elements Based on Traditional Chinese Medicine, to replenish the energy of these organs to increase her immune system and also, associating auricular acupuncture with apex ear bloodletting and Chinese dietary counseling. The patient improved a lot with this treatment and are still using until today all the measurements [15].

As I showed that quite all population is considered immune suppressed due to energy deficiency situation, this is the real cause of herpes zoster formation nowadays and not the reactivation of varicella virus inside the body [8].

In this case, using this kind of reasoning, the use of herpes zoster vaccines to reduce the formation of herpes zoster could not work as the disease is not caused by the varicella zoster virus but by energy deficiency and formation of internal Fire [16].

For this reason, I presented in the webinar of 16th World Congress on Infection Prevention and Control that was held in Dubai, UAE, in 2020, where I showed that patients with herpes zoster could not necessitate to receive isolation because the formation of these symptoms is caused by energy imbalances and formation of internal Fire and not due to reactivation of the virus [17].

The conclusion of this article is that the majority of herpes zoster manifestations are not caused by reactivation of varicella zoster virus because it is caused by energy deficiency and formation of internal Fire, as we are passing through another phase of our planet where the contamination of our environments to the electromagnetic radiation, is causing a reduction in the internal energy of our internal massive organs, leading to a state of immunodeficiency [8].
