Problem summary: Covid 19 patient healing

We had multiple patient with below symptoms

- Body temperature was high
- Sneezing and cough
- Pneumonia
- Congestion in the lungs
- Breathing problems

Our solution

All our patients were remote from the location of our healers. We used Reiki distant healing to heal all our patient's.

Covid 19 healing solution:

- Normalize body temperature of the patient.
- Cleanse brow energy center, throat energy center and heart energy center. In case of headache and high fever more focus on crown energy center required.
- First step we cleansed patient's respiratory system and destroyed covid 19 using our inhouse product (set of healing procedure) LV2CVD.
- Reiki distant healing given to both the lungs and fluid/phlegm removed.
- Energized patient's immune system, circulatory system, nervous system. Healer may also need to energize lymphatic system (in case of cancer patient's or if there are any blockages in lymphatic system).

- A Reiki distant healing given to respiratory system daily 2 times a day and reduced patient's breathing difficulties. Oxygen level of the patient has been normalized.
- If the patient are suffering from any prevailing diseases, then it needs to be healed after healing respiratory system. If there are any clots in lungs, heart or any other part of the body which can be removed to using our energy healing methods.

Methods used in healing:

- Reiki distant healing (using natural energy healing).
- Patients can take hot water steam to flush out negativity from respiratory system. If required then can add 2 drops of eucalyptus oil in the hot water.
- No medicines given during the treatment.
