Problem summary

A 55 years aged male patient had a superficial urinary bladder cancer in 2019. It recurred again in March 2021.

Clinical impression: A superficial urinary bladder cancer:

1. Initially our patient had cancer in 2019 and it was addressed by radiation method.

In 2021 during the month of March, patient approached Heal The World (our health care firm) seeking healing help.

2. Patient was suffering prevailing diseases such as high blood pressure, high cholesterol and skin ailments.

Our solution

We have suggested patient's relative that 63 days of both Reiki Distant Energy healing and Mexican Healing (light healing) methods to heal the cancer.

We have developed LV2CCD inhouse cancer healing product to heal the cancer. This is a product (a set of healing procedures) to be followed by healers when healing a cancer disease.

Within 12 days of healing (during the first cycle of 21 days) of Reiki Distant healing and Mexican healing, we could see the drastic result in patient's recovery. We are currently continuing with our healing procedures. However, we have received positive feedback in terms of patient's recovery. We have received the patient's biopsy report of the bladder and it turned out to be normal. Apart from recovery from cancer, his other diseases such as HBP, high cholesterol are also normal.

During our healing treatment, patient was in UAE and our healer's were in India. We healed the patient's cancer remotely without touching the patient. (Through Reiki and Mexican Distant healing method). Total time taken 12 days and efforts to heal the cancer was 11 hours. It's another cancer miracle carried out by our Heal The World team.

Methods used to heal cancer:

1. Reiki distant healing.
2. Mexican distant healing.
