People pray to God during life and at the end of life. People usually don't pray to God at the beginning of life i.e., during the creation of a new human being and during conception.

This paper discusses what beneficial effects one can get by worship, prayer and meditation (WPM) during the creation of a new human being and during conception. If the foundation of a building is not strong, the building will fall apart. Similarly if the foundation of a newly created human being is not strong, that human being will fall apart.

The mechanism of action of beneficial effects of WPM is mediated through the Electromagnetic Radiation (non-ionizing) Energy [1,2] emanating from the minds of the parents during WPM. The WPM transmits God's energy to the parents as EME which is then transmitted to the newly created human being.

The human being is composed of three parts – Physical Body, Mind and Soul. The Electromagnetic Energy (EME) emanating from the minds of father and mother will influence all three parts (Body, Mind, Soul) of newly created human being.

BODY – The EME of the minds of the parents resulting from WPM can modulate the activity of the sperm and ovum (Figure 1) creating a human being of good physical health.

The EME of the minds of the parents emanating as a result of WPM by the parents can also modulate the activity of DNA (Figure 2) resulting in decreased incidence of birth defects and decreased incidence of congenital disease, Autism, ADHD, Down Syndrome etc.

MIND- The EME emanating from the minds of parents as a result of WPM during conception may result in the creation of human beings with good mental health (Figure 3) decreasing the incidence of mental health problems thus decreasing the incidence of gun violence among school children.

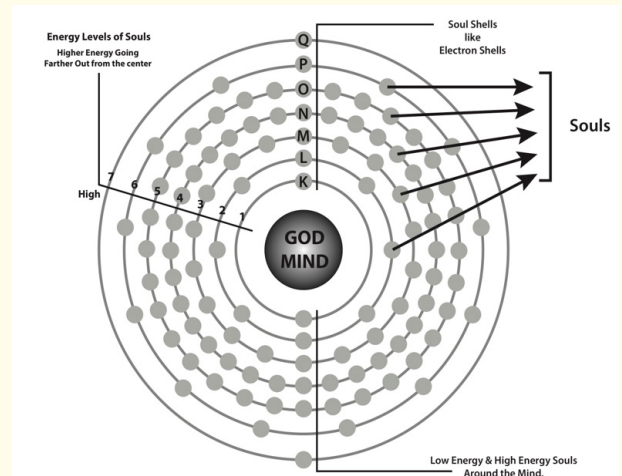

SOUL – There are all kinds of souls floating in the space ready to take birth in the form of human body – great soul, good soul, bad soul and evil soul (Figure 4). The EME emanating from the minds of parents as a result of WPM during conception may download the high energy soul in the newly created human being thus decreasing the incidence of creating human beings with bad soul or evil soul which in turn may reduce the creation of human beings with the soul of serial killer, terrorist, pedophile, kidnapper, gang etc. thus reducing crimes.

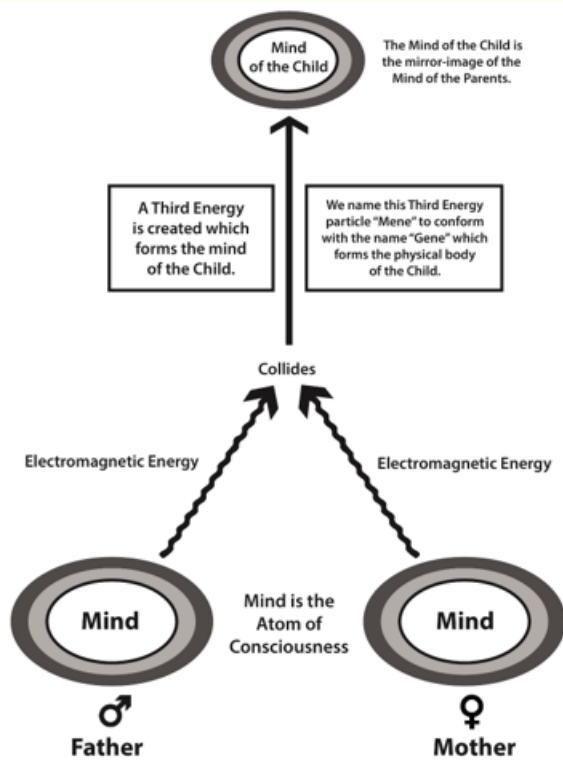

**Figure 1:** Modulation of the activity of Sperm and Ovum by the EME of the minds of the parents.

**Figure 2:** Modulation of the activity of DNA by the EME of the minds of the parents.

**Figure 4:** Quantum Mechanics of formation of soul in a newly created human beings.

**Figure 3:** Quantum Mechanics of formation of mind in a newly created human beings.

In conclusion the WPM by the parents at the time of creating a new human being is of paramount importance in the creation of a new generation of human beings with good physical health, good mental health and good soul health thus reducing the incidence of criminals, crimes, serial killers, terrorists, gang, and gun violence resulting in a peaceful world than what it is now.
