The science of Physics basically deals with Energy and Matter. The Materialistic Physics deals with Materialistic Energy (e.g., electricity, magnetism, heat, light, nuclear energy etc.) and Non-living Matter.

Whereas the Spiritual Physics deals with Spiritual Energy (Electromagnetic Energy of the Human Mind) [1,2] and Living Matter (e.g., human being).

In the creation of matters, the Creator kept some similarities in the basic component of non-living matter and living matter – molecule, atom, subatomic particle and God particle.

	Non-living Matter	Living Matter
Molecule	A piece of metal	Physical Body of the Human being
Atom	Proton, Neutron Electron	Mind
Subatomic Particle	Quarks	Consciousness
God Particle	Higgs Boson	Soul

Table 1: Shows some similarities in the basic composition of non-living matter and living matter.

The human being is composed of three parts – Body, Mind and Soul. While the physical body of the human being comes under materialistic world, the mind and soul come under spiritual world. Just as the Earth possesses both gravitational forces and electromagnetic forces, the human mind possesses both gravitational forces and electromagnetic forces. It is these forces that create the bonding between the human beings – bonding between the husband and wife, bonding between the parents and children, bonding between other relatives, friends, non-relatives, and not yet known people thus creating loved ones, less loved ones, and not loved ones.

The fact that Spiritual Energy exists is proven by the beneficial effect of worship, prayer and meditation on the recovery from medical illnesses.

Based on the above facts, there exists the need for establishing a new branch of science called Spiritual Physics.
