Before the beginning of life every human being was residing in the testicle of their father. Father's wish is the first event that brought every human being to earth.

So for every human being what could be more glorious than respecting and worshipping their father -

- Father is the Heaven, Father is the Religion,
- Father is Worshipable.

The second event in the creation of a new human being is to grow in the mother's womb for nine months.

So, for every human being what could be more glorious than respecting and worshipping their mother -

- Mother and Motherland are more glorious than Heaven.

Therefore, the children should respect and worship their parents to receive their parents' blessings in the form of "Electromagnetic Energy (EME) of their Minds" and parents should constantly shower their blessings on their children. It is these blessings or EME of their mind (Theo-pharmaceuticals) that can keep their children both physically and mentally healthy.

However, parents have to remain constantly in touch with the Almighty God through Worship, Prayer and Meditation in order to acquire and transmit the EME of their minds to their children [1,2].
