Theophysics

- A New Branch of Physics.
- A Prescription for Better Human Physical Health, Mental Health and Soul Health
- Of Greatest Benefit to Humankind.

The interaction of human being with God during worship, prayer and meditation (WPM) is mediated through the Electro-magnetic Energy (EME) of the Human Mind [1,2] - which constitutes a new branch of Physics called Theophysics (Spiritual Physics).

The existence of EME of human mind was discovered during 50 years of theoretical research on worship, prayer, meditation and near-death experience.

The science of Theophysics can explain everything in human life from conception to earthly birth and from earthly birth to death.

The Laws of Theophysics follow the Laws of Materialistic Physics such as the Theory of Relativity, Quantum Mechanics, and Quantum Entanglement (Table 1 and Figure 1).

	Non-Living Matter (Materialistic Physics)	Living Matter (Spiritual Physics/ Theophysics)
Molecule	A piece of metal	Physical Body of the Human Being
Atom	Yes	Yes-Mind
Subatomic Particle	Proton, Neutron Electron	Consciousness
God Particle	Higgs Boson	Soul
Quantum Mechanics	Yes	Yes
Quantum Entanglement	Yes	Yes
Theory of Relativity	Yes	Yes

Table 1: Shows Some Similarities in the Basic Composition and Properties of Non-Living Matter and Living Matter.

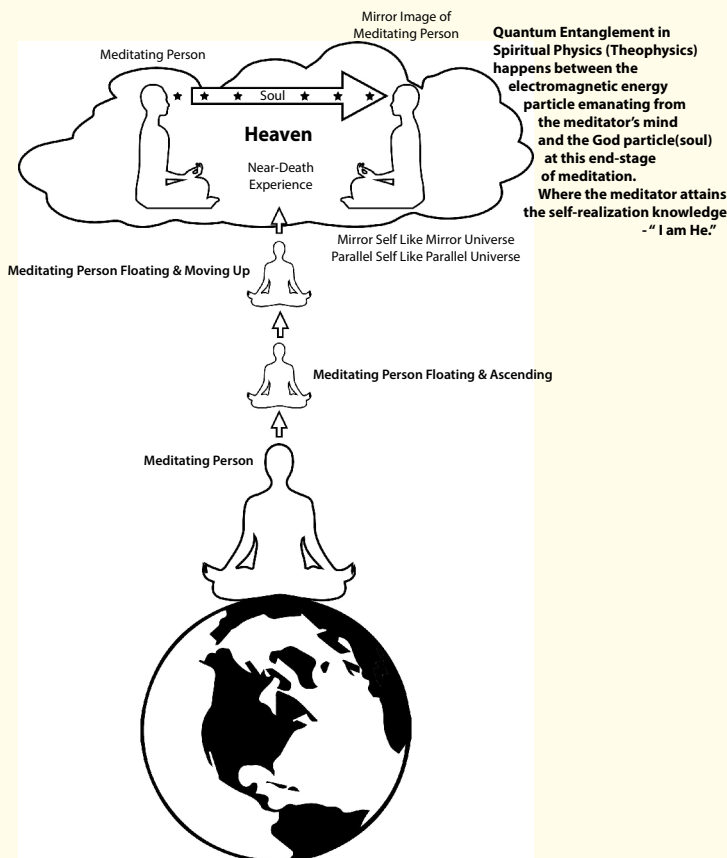

Figure 1: Shows how and when during meditation, the Quantum Entanglement happened between the EME particle of human mind and the God's Energy Particle (Soul)

Table 1 shows the similarities between the Materialistic Physics and Spiritual Physics. Figure 1 shows the phenomenon of Quantum Entanglement in Spiritual Physics.

The concept of QE was first mentioned in India, 5,000 years ago - in Hindu Scripture Bhagavad Gita in which Lord Krishna stated to His Disciple Arjuna that He (God) can exist at two farthest distant points of the Universe at the same time as Spiritual Energy Particles.

The various saints, sages, spiritual devotees and meditators who attained QE between the EME particles of their mind and the Spiritual Energy particle of God (Soul) are Ramprasad, Chaitanya Mahaprabhu, Buddha, Ramkrishna and one of the authors (Shree Taposh K. Chowdhury) of this article.

The science of Physics essentially deals with Energy and Matter. The Materialistic Physics deals with Materialistic Energy (e.g.,

electricity, magnetism, heat, light, nuclear energy etc.) and materialistic Non-living Matter whereas the Theophysics (Spiritual Physics) deals with Spiritual Energy (God's Energy —Soul) (1,2) and Spiritual Living Matter (e.g. EME of human mind).

The fact that Spiritual Energy exists is proven by the beneficial effect of worship, prayer and meditation on the recovery from medical illnesses [3-5].

In the creation of matters, God, the Creator, kept some similarities in the basic composition and properties of non-living matter and living matter – molecule, atom, subatomic particle and God particle (Table 1).

The human being is composed of three parts – Body, Mind and Soul. While the physical body of the human being comes under materialistic world, the mind and soul come under spiritual world (Table 2).

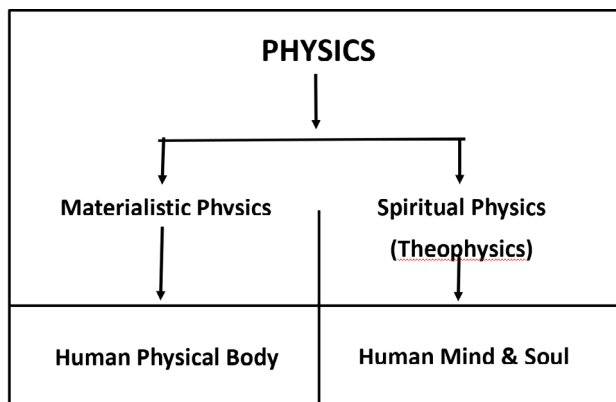

Table 2: Shows how the three parts of human being fall under two branches of Physics

Just as the Earth possesses both gravitational forces and electromagnetic forces, the human mind also possesses both gravitational forces and electromagnetic forces.

The gravitational force of the human mind is innate. It is the gravitational force of the mind that creates the bonding between the human beings – bonding between the husband and wife, bonding between the parents and children, bonding between other relatives, non-relatives, friends, and other people thus creating loved ones, less loved ones, and non-loved ones. The gravitational force of human mind between the parents and child develops as soon as the child is born. The gravitational force between the biological parent and biological child is much stronger than the gravitational force between the stepparent and stepchild.

The electromagnetic force of human mind is adaptive and kicks in in the form of prayer when a loved one gets sick or faces other materialistic problems such as problems in the job, financing, law, etc. It is the electromagnetic force of the human mind that helps people recover from sickness or from other materialistic problems mentioned above.

The knowledge and practice of Theophysics during life can prevent the crimes, gun violence, mental health problem and gun violence ideation in children [6].

In conclusion Theophysics deals with the spiritual energy (God’s energy - Soul). and spiritual matter (human mind) and the interaction between the electromagnetic energy particles of human mind and God’s energy particles (soul) which leads to better human physical health, mental health and soul health resulting in better human life with little or no crimes, no criminals and no evil souls.
