Abstract

This article deals with the Role of Theophysics (Electromagnetic Energy Particle of the Human Mind And God's Energy Particle - Soul) in the formation of Human Mind and Soul at Conception. The Human being Is made up of three parts - Physical Body, Mind And Soul. While the Science of Embryology has revealed how the physical body of the Human Being is formed in the Womb, the Modern Science has not yet revealed > How The Human Mind and Soul are formed In the Embryo. This article attempts to reveal how the Mind and Soul of Newly Created Human Being are formed at conception. This knowledge was attained during Fifty Years of Theoretical Research on Worship, Prayer, Meditation, and Near- Death Experience.

Keywords: Mind, Soul, Gene, God

Introduction

The human being has three parts – Physical body, mind and soul. The modern science has revealed how the human physical body is formed in the womb — by the science of Biology and Embryology [1] — fertilization of ovum by sperm followed by cell division, multiplication and cell differentiation to form different tissues, organs and systems which are governed by Chromosome —> DNA —> Gene.

However, the modern science has not discovered the mechanism of formation of human Mind and human Soul until now. A team of doctor, scientists, divine mentor and spiritual guru have discovered the scientific mechanism of formation of human mind and soul by virtue of their 50 years of spiritual research, meditative research and near-death experience research [2].

Materials and Methods

The information presented in this article was conceived by all the authors, during their worship, prayer, meditation and near-death experience with close encounter with God, seeing the physi-

cal appearance of the God, hearing the voices of God's teaching (how the mind and soul are formed) and hearing the order from the God to disseminate this knowledge to God's people on the earth.

Results

Since this is a theoretical research and observational research, and not a laboratory bench research, no quantitative data are available. The authors propose and theorize that the mechanism of formation of human mind and soul is mediated through the science of particle physics and quantum physics of Electromagnetic Energy (EME) particle of the Human Mind and God's energy particle - soul (Theophysics) [3-5] (Figure 1 and 2). The authors name these EME particles of human mind as 'Mene' ("gene" of Mind) and "Sene" ("gene" of Soul) to conform to the name Gene for physical body.

Figure 3 depicts how the "gene" of mind ("Mene") works. When there is a physical union between father and mother, the EME particle of Father's mind and the EME particle of Mother's mind (emanated at the time of ejaculation and orgasm) collide each other to create a third energy which forms the mind of the child. The mind of the child is the mirror-image of the mind of the parents.

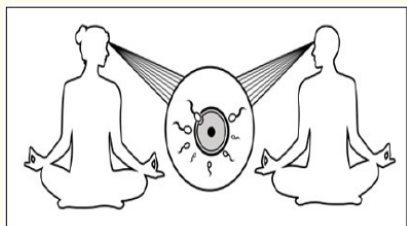

Figure 1: Influence of the EME of the minds of the parents on the activity of the sperm and ovum.

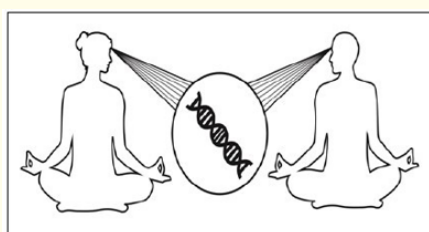

Figure 2: Influence of the EME of the minds of the parents on the Chromosome -> DNA -> Gene.

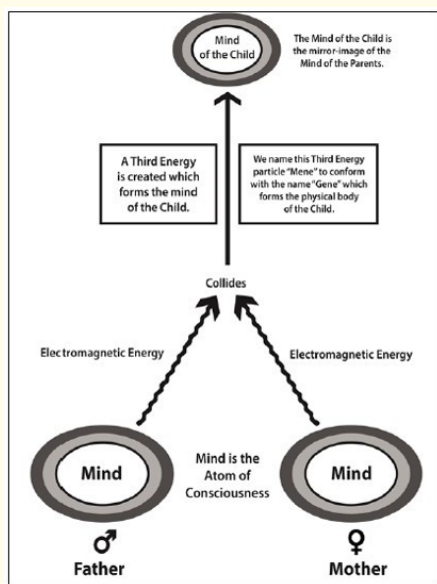

Figure 3: Role of Quantum mechanics in the formation of mind in a newly created human being.

Whatever thoughts are going on through the mind of the parents during physical union, same thoughts are imparted to the mind of the child.

Figure 4 depicts how the “gene” of soul (“Sene”) works. There are all kinds of soul floating in the atmosphere and space - great soul, good soul to bad soul and evil soul. During the physical union of the father and mother, one of these souls is downloaded in the newly created human being depending on the worship, prayer and meditation of the parents during the creation of the new human being.

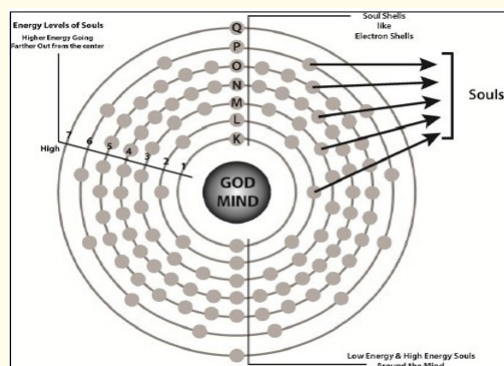

Figure 4: Role of Quantum mechanics in the formation of soul in a newly created human being.

Discussion

While the mechanism of formation of the physical body of the newly created human being is mediated through the science of physiology, biochemistry and biophysics governed by the biological molecule Chromosomes -> DNA -> Gene, the mechanism of formation of mind (atomic body) and soul (subatomic body) is mediated through the physics particles – the Electromagnetic Energy of the Human Mind.

Conclusion

The human being has three parts — Physical Body, Mind and Soul. So far we knew how the physical body is formed —through the science of Embryology. Now we know how the Mind and Soul are formed through the science of Theophysics (3-5). While the

formation of physical body is governed by the biological molecules — Chromosomes —> DNA —> Gene, the formation of Mind and Soul are governed by Particle Physics - the Electromagnetic Energy particle of the Human Mind and God's Energy particle - soul (Theophysics). The knowledge and practice of this new information on Theophysics presented here would be of greatest benefit to humankind.
