The Quantum Mechanics [1,2] in Materialistic Physics also applies in Spiritual Physics (Theophysics). The wave-particle duality applies in both Materialistic Physics and Spiritual Physics (Theophysics).

Just like in Materialistic Physics, an electron, when observed, behaves like a particle and an electron, when not observed, behaves like a wave. Similarly, in Theophysics, God's energy, when observed (that is when God is worshipped and prayed), behaves like a particle (that is God stays with human) and God's energy, when not observed (that is when God is not worshipped and not prayed), behaves like a wave (that is God goes away from human).

Thus Quantum Mechanics forms the scientific basis of why human should worship God, why human should pray to God and why worship and prayer help recovery from medical illness.

This is the first time we have scientific reasoning - why human should worship God and pray to God.

The above knowledge and the practice of it in daily life would be of greatest benefit to humankind.

Just like Mass-Energy equivalence applies in Materialistic Physics, similarly Mass- Energy equivalence also applies in Spiritual Physics. In Materialistic Physics, Mass is converted into Energy and Energy is converted into mass which is diligently expressed by Einstein's famous equation  
 $E = mc^2$

Where E = Energy, m = mass and c = velocity of light.

Similarly in Spiritual Physics, God, the Energy (Soul), is converted into Mass, the Human Body at conception. The Human Body, the mass, is converted back into Energy, the God (soul), at death.  
God —————> Human (at conception)  
God <————— Human (at death)

The above Mass-Energy equivalence in Spiritual Physics can be expressed by the following equation -

$$E_g = m_g \cdot v_g^2$$

Where  $E_g$  = Energy of God,  $m_g$  = mass of God,  $v_g$  = Velocity of God  
Assuming God exists in the form of energy particle.

Just like in materialistic physics, energy and mass are two forms of the same thing, similarly in Spiritual Physics, God, the energy and human, the mass are two forms of the same thing.

The following are the simplest definitions of long-debated relationship between the following terminologies:

God = Energy.

Religion = A method to acquire God's energy.

Science = Secrets of God's Creation.
