Many people often ask a question - if there is God, why there is human suffering? The answer is simple - Human is the cause of Human Suffering, not God.

Why? Here is the explanation. God has given human the power of creating a new human being by the physical union of a Man and a Woman. The human being is composed of three parts - Physical Body, Mind and Soul.

Currently when humans create a new human, humans pay attention only to the pleasure of the physical body.

Humans don't pay attention to what kind of mind and soul are the new human beings going to be born with - great mind, good mind, bad mind or evil mind and great soul, good soul, bad soul or evil soul.

It is totally in the control of parents to create a new human being with good mind or evil mind and good soul or evil soul.

How? At the time of creation of a new human being, the electromagnetic energy (EME) [1,2] is released from the minds of the parents. These energies collide each other at the time of climax creating a third energy which creates the mind of the newly created human (Figure 1). Whatever thought processes are going on in the minds of the parents during the creation of a new human being, are transmitted via this third energy to the mind of the newly created human being. If parents are thinking of good things, the child will be born with good mind and good soul. If the parents are thinking of bad things, then the child will be born with bad mind and bad soul leading to human sufferings.

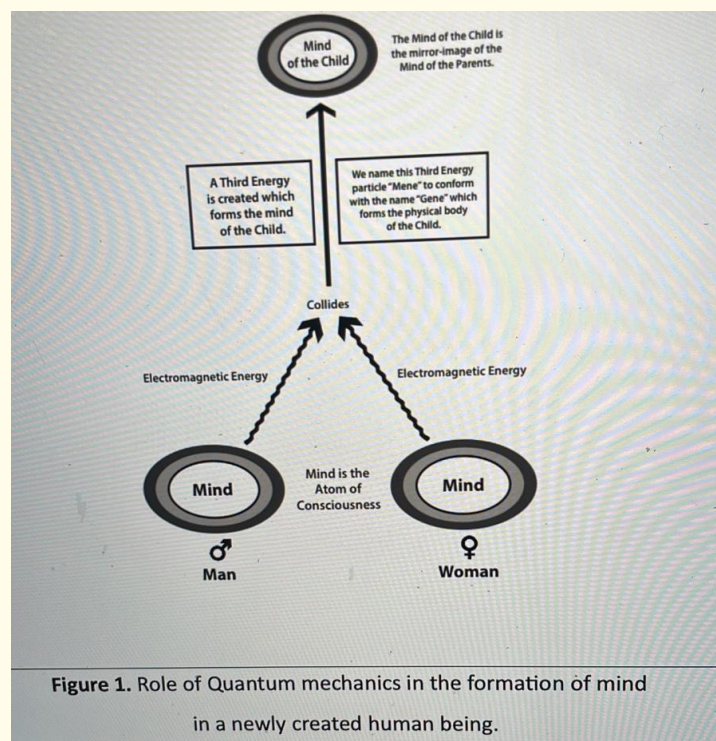

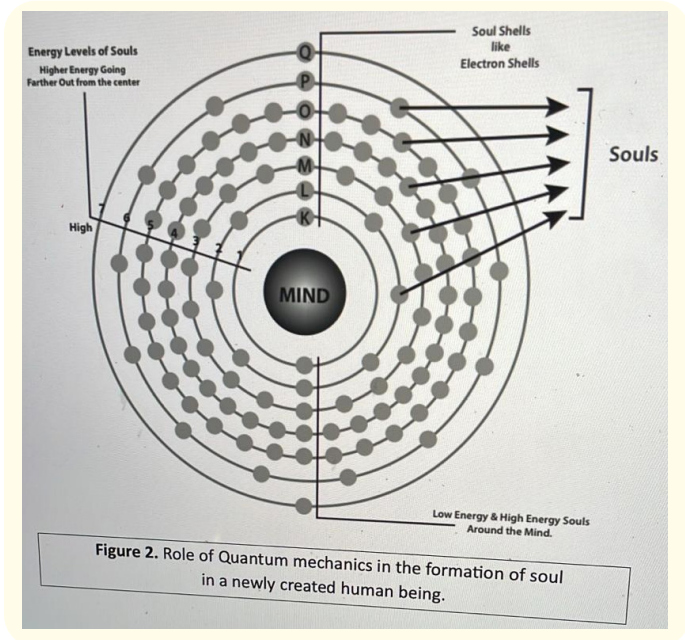

Figure 1. Role of Quantum mechanics in the formation of mind in a newly created human being.

All kinds of souls - great soul, good soul, bad soul, evil soul - are floating around human mind (Figure 2). During the creation of a new human being, the parents have to download the good soul or great soul on to the newly created human being by virtue of worship, prayer and meditation (WPM). If not, then the child will be born with bad soul or evil soul leading to human sufferings.

The Prescription to prevent human suffering would be to acknowledge and appreciate God during creation of a new human being by chanting the Mantra - “By the God, For the God, Of the God”.

The downloading of a great mind or good mind and a great soul or good soul during the creation of a new human being is totally under the control of the parents by WPM thus preventing human sufferings.

In conclusion the knowledge and practice of the above ritual during creation of a new human being would be of greatest benefit to human kind to prevent human suffering and to bring World Peace.
